

php代码审计基础篇

第15课 完结

目录结构

data 存放备份数据

protected 网站程序核心文件夹

public 存放css、images、js、swf等模板公用文件

upload 存放上传文件

.htaccess apache伪静态规则文件

httpd.ini iis伪静态规则文件

index.php 网站入口

robots协议 robots.txt

升级日志.txt 详细升级日志记录文件

全方位看

明白目录里的文件做哪些处理

不是从黑盒入手前后台源码位置区分

```
public function del()
```

```
public function tpadd()
```

```
public function delpic()
```

导致不同的漏洞

等等..

MVC全名是Model View Controller,是模型(model)-视图(view)-控制器(controller)的缩写。用一种业务逻辑、数据、界面显示分离的方法组织代码,将业务逻辑聚集到一个部件里面,在改进和个性化定制界面及用户交互的同时,不需要重新编写业务逻辑。

controller文件夹存放控制器文件, view文件夹存放视图文件, model文件夹存放数据文件

```
public function update()
```

```
public function editAdmin()
```

```
public function delall()
```

等等.

感谢大家完成本套课程学习,祝大家在代码审计越走越顺。未来遥远,自己可期!

The image features a central figure of a person wearing a black hoodie, with their right hand pressed against their forehead in a gesture of stress or concern. The background is a vibrant blue digital landscape. It includes a glowing globe on the right side, a network of interconnected nodes and lines, and several padlock icons scattered throughout, symbolizing security or digital threats. The overall aesthetic is high-tech and cyber-themed.
